

ABOUT COMPANY

Crossinform creates and implements complex IT systems for key industries: manufacturing, energy, finance, and logistics.

Our approach is based on deep business process analysis and clear methodologies.

This ensures reliability, scalability and on-time project delivery.

We offer a full cycle: from consulting and design to development, implementation, and support of your system.

RECRUTECH

Intelligent candidate selection

The system uses artificial intelligence to refine additional candidate data, and also provides advanced filtering and candidate testing using proctoring, including programming skills testing.

MAIN FEATURES

1. AI assistant for primary screening

Automatically analyzes all resumes and engages with candidates, requesting missing information. This saves recruiters up to 80% of their time during the initial screening process.

2. Flexible filtration system

Instantly search by any criteria: experience, language level, university, salary expectations, and other parameters you specify. Find the ideal candidates in minutes.

3. Online testing with proctoring

Assess your hard skills with built-in tests. The proctoring feature ensures fair results and objective assessment.

4. Automatic integration with hh.ru

Assess your hard skills with built-in tests. The proctoring feature ensures fair results and objective assessment.

5. Deep AI-powered candidate analysis

Our artificial intelligence not only collects data, but also assesses candidate suitability, analyzes experience, and helps conduct structured interviews.

6. Expert support 5x8

Our team of technical specialists is always available during business hours (5 days a week) to help with setup and answer any questions.

HOW TO CONNECT:

Integration: We connect Recrutech to your hh.ru profile in 15 minutes.

Setup: You prepare a job description, key filtering requirements (experience, salary, skills), and, if necessary, test assignments.

Launch: Once published, the vacancy is automatically posted on HH.ru, and Recrutech begins accepting and processing responses. The system automatically engages with candidates and moves the best ones to the "Phone Interview" stage, ready for your evaluation.
